Salt Lake City, Utah 84116

DIVISION OF
OIL, GAS & MINING

Dear Mr. Smith:

As per your request I have enclosed a set of maps indicating the affected areas for our operation in the NW 1/4 of Section 2. As you will note the surface equipment for Retort #24 is shown on a separate map and will be typical of the necessary facilities for future Retorts #25, #26 and #27 (although arrangement may differ from retort to retort). The exact locations for Retorts #26 and #27 have not been determined and are therefore not indicated. However, at present they will be located very near to #24 and #25 and will be of the same surface dimensions (commercial size retorts).

Also enclosed are the plans and appropriate drawings of the new evaporation pond. Attendant to those plans is a copy of the letter from the State Bureau of Water Quality granting approval for the pond. We apologize for not informing your office of these plans and trust that they will meet with your approval.

Should you have any further questions, please contact me. Thank you for your assistance.

Sincerely,

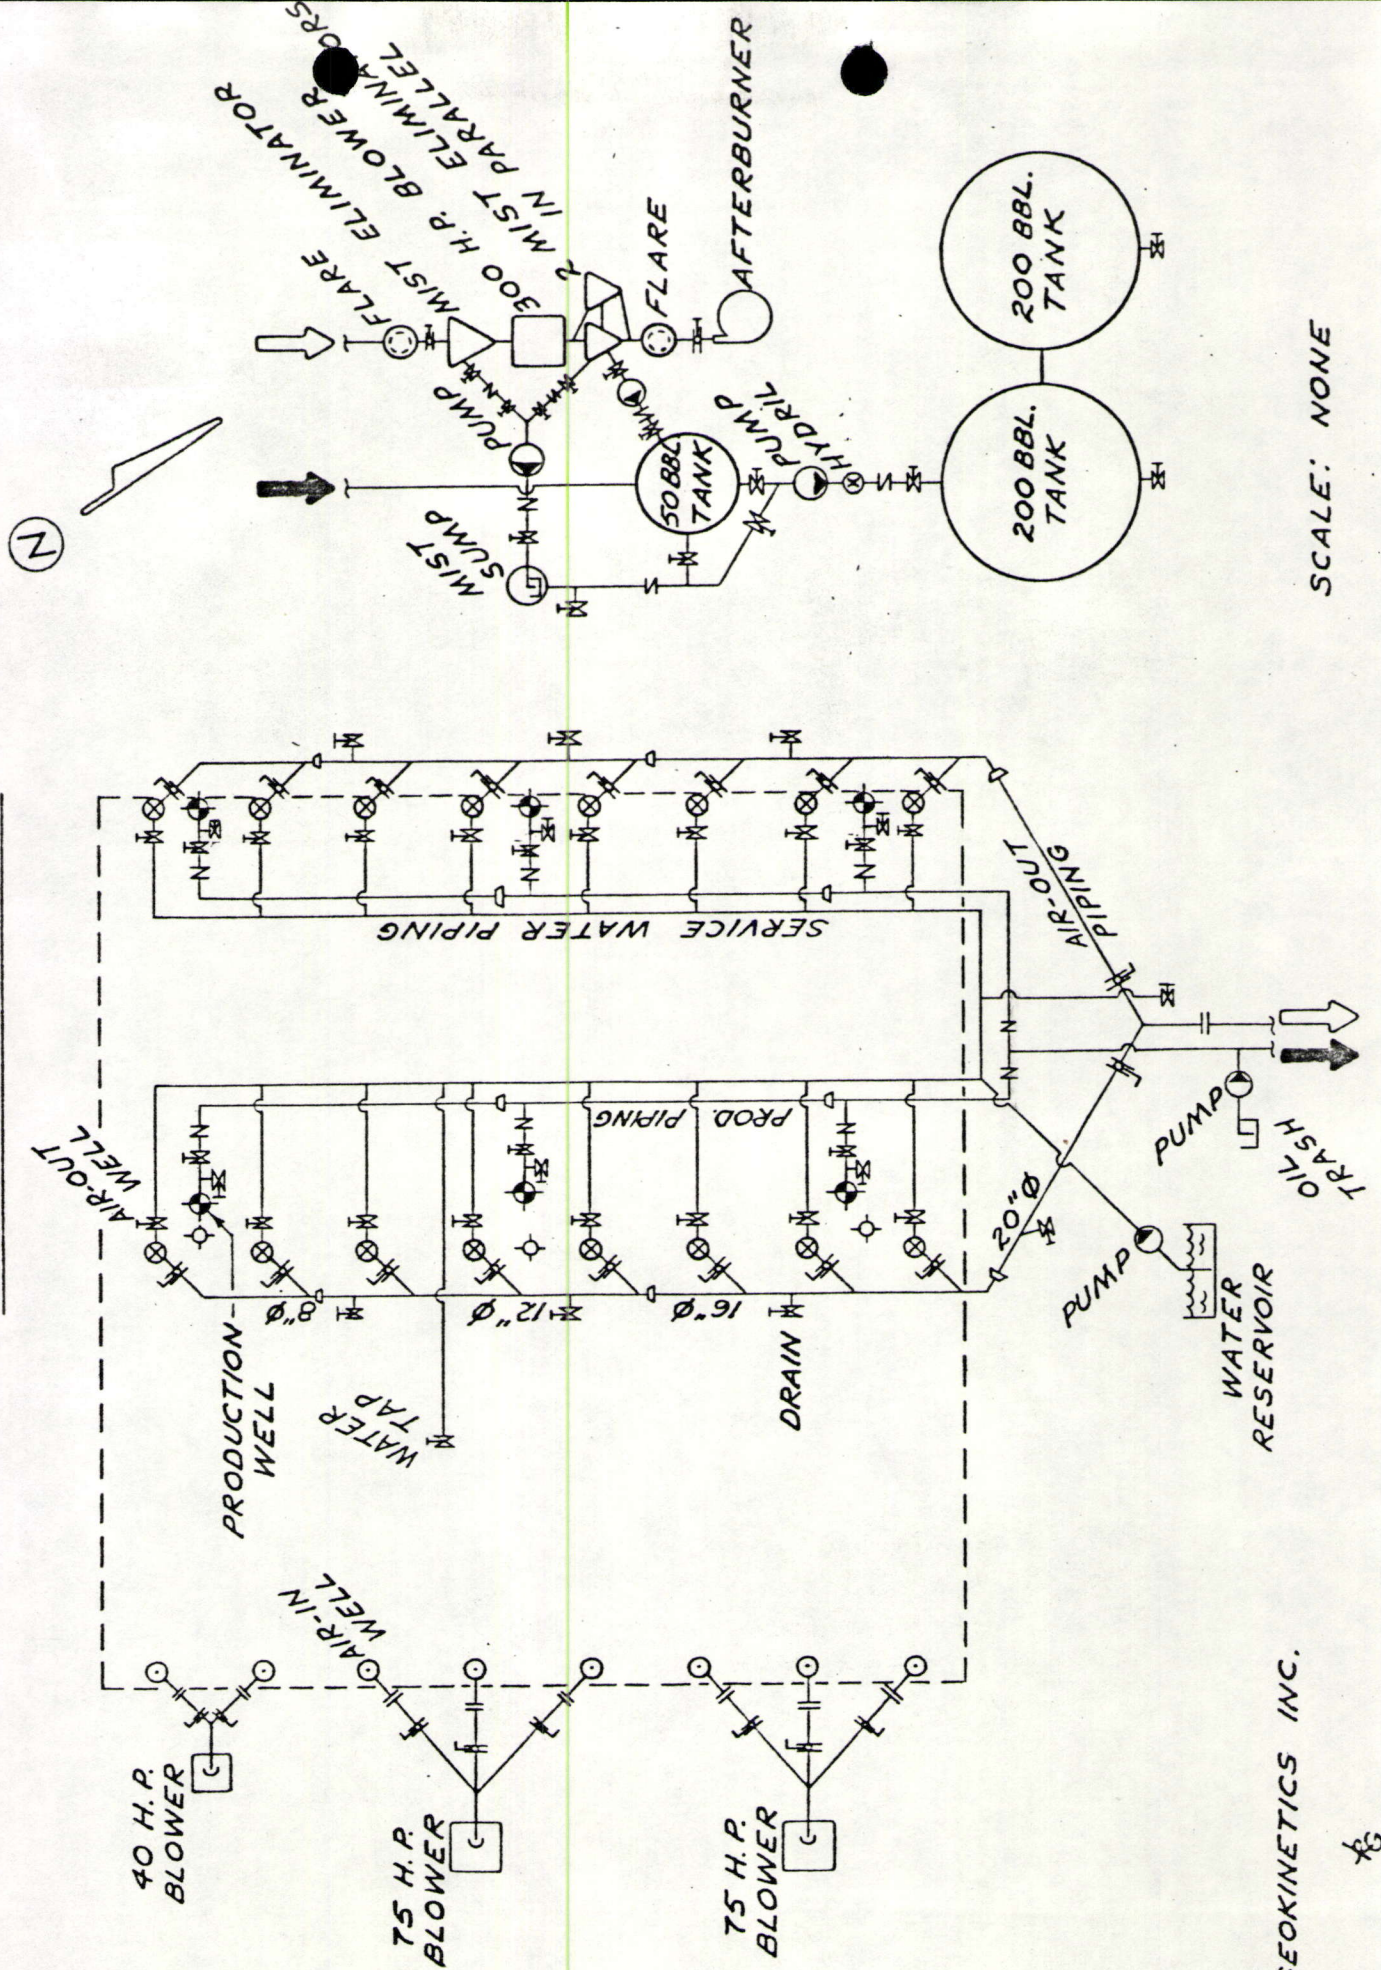

Rusty Lundberg

Rusty Lundberg
Environmental Engineer
